Rag Rug Picture (Yok Yok), 2017
Rag rug fabrics, thread, cotton canvas
135x115 cm

Rag Rug Pictures

Dario Wokurka

24.04.-26.04.2023

0. Rag rugs from various hardware stores, supermarkets, wholesalers, etc. are collected, minimizing an overly specific appearance of the material.
1. One rag rug per picture.
2. Laundry tag is removed, marking the rug's orientation which in turn sets the picture's orientation and the sequence of fabric strips.
3. Rug is unravelled.
4. Rags are ironed flat and sewn together on their short ends, while maintaining the original sequence, creating one continuous strip.
5. Strip is cut at an arbitrary length which will be the approximate width of the future picture format.
6. Lines of strips are sewn together along the long edges until the material is used up, resulting in the approximate height.
7. Result is stretched over a cotton canvas of dimensions that allow for the maximum amount of surface to remain visible. This might require several attempts.
